This state of the art equipment is the latest tool in crime prevention and security management. The hands free unit enables the user to have an instant record of everything they hear and see. The audio facility is compatible with most covert ear-microphone systems. We have engineered a 360° recordable movement for this model which ensures user specific positioning.

Security professionals working long hours will appreciate the additional comfort afforded by the flexible headband and feather light custom built camera unit.

RoboCam is the last line of defence against supurious and costly claims. If increasing insurance claims are an issue to your business, investing in this ground breaking equipment will put you back in control of your future.

RoboCam is an essential asset for any professional security operative that wants to protect their livelihood. A false allegation could cost an operative their hard earned license and consequently their means to earn a living. RoboCam can ensure that this never happens to you.
