# RECORDERS

## UniGuard Ultra Robust Recorder

The standard UniGuard Ultra Robust Recorder will hold over 4000 events in its non volatile memory, each event holding identification data, date and time accurate to the second.

Being a highly customizable system, it will allow you to set up an identification serial number to each of your wands, supporting up to 9999 wands in the one system.

"Using the UniGuard Systems is so simple and easy."

1. Set up your patrol Tour by attaching a series of buttons over your patrol tour.
2. Set up your UniGuard software and customize your regions, sites and checkpoints.
3. Every guard is issued a recorder, when he has been to a checkpoint he simply scans the button attached to a hard surface by reading it with the recorder.
4. At the end of their patrol tour, the employee simply places the recorder into a downloader and let the UniGuard software do everything else on its own, it's that easy!

## UniGuard Ultra Robust Supervisor

The Supervisor recorder holds almost 33,000 or eight full normal recorders or combinations thereof. Each normal recorder holds over 4000 hits.

One of the Supervisor Recorder's best features is that it can be used to empty other recorders of data, out in the field, and then carry that data back to the office for downloading.

This means that rather than having to bring the recorders to the office for downloading, or go out in the field with a laptop, the data from recorders in the field is simply poured into the supervisor recorder, leaving the other recorders on site.

## ValuMate2 Lightweight Recorder

The ValuMate2 Patrol Recorder is a light-weight yet hardy data logger. It is housed in an aluminum, waterproof and shock resistant case to ensure performance in adverse and robust conditions.

The ValuMate2 Patrol Recorder is capable of recording 4,000 separate patrol events. Installation is quick and simple as no wiring is required between patrol points

# SOFTWARE

## UniGuard 11 Standard

UniGuard standard software is designed with ease of use in mind. It is directed squarely at the entry level user with reports at your fingertips.

## UniGuard 11 Enhanced

UniGuard Enhanced software offers many new fields and options and is directed at smaller companies who want very powerful tools to scrutinize employee movements.

## UniGuard 11 Professional

UniGuard Professional software is aimed at corporations with visit regions over vast areas. It has a high level of reporting as well as the new issues feature which can track issues to resolution.

## UniGuard 11 LIVE

The new UniGuard LIVE software is designed to do the job of an officer that is dedicated to the system. It will automatically import data from the field in its own inbox and generates reports to a schedule as well as e-mail the reports automatically to your clients according to the schedule that you put in. If an exception is detected, UniGuard 11 LIVE will automatically create an issue for a manager to track and resolve. UniGuard 11 LIVE does the work of a full time employee.

## System Requirements

### Operating Systems:

Windows® 2000  
XP Professional SP2  
2003 SP2

### Processor:

1200 MHz or faster

### Memory:

512MB or more

### Hard Disk Space:

100MB or more

### Colour Depth:

32 bit

### Screen Resolution:

800x600 (1024x768+ recommended)

### Hardware:

Serial Port/USB-Serial converter

### Other:

Installed printer or print driver

# OTHER ESSENTIAL HARDWARE

## Downloader/Encoder

The Downloader Encoder Set is a simple piece of hardware which downloads data from your UniGuard recorder into your computer. Information downloaded is then read by your UniGuard software package and displayed within the program.

The Encoder reads point visit tag serial numbers to facilitate recognition of the tag's allocated number.

The UniGuard Downloader Encoder Set does not require electrical or battery power to operate and connects to a 9 pin serial port. USB to Serial adaptors are available.

## Encoded Patrol Visit Points

The UniGuard point visit tags are inexpensive tamper-proof point data generators which hold information for the recorders using micro-chip technology. The chip is housed in a stainless steel container, each with its own unique and permanently assigned factory-lasered address. The points can operate between  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$  temperatures and have a lifetime of over 100 years!

The UniGuard Point Visit Tags are fixed to any hard surface using stainless steel tamper-proof brackets which mount to any surface with anti vandal clutch head screws.

## 12 Position Events Wallet

The UniGuard Events Wallet is a must-have accessory with your UniGuard System. It will allow you to generate a report of the time, date and location that an incident has happened as well as identifying the name of the officer lodging the report.

# ACCESSORIES

## Recorder Pouches

For easy carrying of your recorder, we have black pouches available. The pouch is extremely durable and will last for many years, even at the hands of unruly, destructive employees.

Holsters are available in both leather and canvas, are extremely hardy and will clip onto any utility belt.

## Tamperproof Wall Brackets

Stainless steel wall bracket kits are made in Australia from 316 grade stainless steel and will ensure that your checkpoint tag remains securely where you installed it. Brackets come with specially made tamperproof one-way screws to adjust them to any hard surface.

## Plastic Personal Identification Tags

Plastic personal identification tags are easily carried on any key chain and allow the recorder to be used to clock staff on and off the job. A normal inexpensive point visit tag snaps into this handy little device.

# PACKAGES

Making it easy for you to get started...

## UniGuard 11 - Robust Starter Pack

UniGuard 11 - Robust Starter Pack is designed for clients who may wish an easy alternative to get a system up and running with minimal mix and matching and the best savings. UniGuard 11 - Robust Starter Pack is adjusted to suit the security industry.

### UniGuard Robust Starter Pack includes:

- 1 UniGuard Ultra Robust Recorder
- 1 Desktop Patrol Downloader/Encoder
- 1 UniGuard 11 - Standard Software
- 10 Encoded Patrol Visit Tags

## UniGuard 11 - ValuMate2 Starter Pack

UniGuard 11 - ValuMate2 Starter Pack is designed for clients who may wish an easy alternative to get a system up and running with minimal mix and matching and the best savings. UniGuard 11 - ValuMate2 Starter Pack is adjusted to suit the cleaning industry.

### UniGuard ValuMate2 Starter Pack includes:
