		38	0

### MISSSED VISIT REPORTS

One of UniGuard Patrol Management Systems' most welcomed feature is its range of Missed Visit reports and Exception reports.

Everything about your patrol route can be set up within the UniGuard software to help you minimize time spent on monitoring your guards.

This includes number of times per shift a guard must visit a given point in their patrol, and the minimum and maximum time intervals between visits to said point.

This is just one of many features incorporated into our software.

To find out more about UniGuard Systems and how little you will need to invest, please contact us.

# ASK THE RIGHT QUESTIONS: GET THE RIGHT ANSWERS!

## HOW WILL UNIGUARD SAVE ME MONEY?

The UniGuard System is a simple inexpensive way to monitor your staff through the course of their shift. Simply set up your system on a computer at your office and let UniGuard run in the background. All your staff need to do is place the recorder into the downloader and you'll instantly get access to UniGuard's powerful report generators, being able to analyze everything that was done, and what was not done. Customize your system to automatically generate those reports and e-mail them to your client or head office instantly the second the recorder is input into the downloader, it's that easy!

## WHAT DO I NEED TO GET STARTED?

UniGuard Patrol Management Systems are incredibly easy to install and set up. The systems consist of recorder units and data units. The recorders are issued to the guards and the point visit tags are spread out through your site. Simply ask your guard to touch the reader head from the recorder against the point visit tag after having visited that checkpoint and that's it, after the shift is over simply place the recorder into the download unit and let UniGuard do the rest of the work.

Why not consider one of our standard starter packs to get your system running?

## DO I PAY A MONTHLY FEE?

**Absolutely NOT!** All of our software and hardware is backwards compatible. So once you purchase a system, you can rest assured that it is yours for life.

**NO ON-GOING OR MONTHLY COSTS!**

## WHAT COMES IN A STARTER PACK?

UniGuard Recorder Unit

UniGuard Downloader Encoder Unit

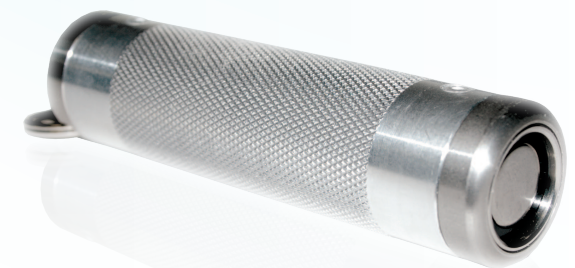

10 Encoded Point Visit Tags

UniGuard 11 Standard Software

## IS THERE AN EVEN CHEAPER ALTERNATIVE?

Try the inexpensive, cost efficient Valumate2.

All the power of the Ultra Robust Recorders in a smaller, light-weight unit. It's less than **10 centimetres** in length and weights just **under 110 grams!**
